## Project Description

- Creating Music – This project to create an audio player that will play a given set of .mp3 songs using HTML, CSS and JS.
- Footer Page – This project uses, HTML, CSS and JS. It has buttons in the footer side, linking to different pages like Google, my blog and resume. Also, uses a bubble effect background created using a javascript library. To get this javascript library, npm – nodeJS was used.
- Menu as Circle – This project displays the menubar as a circle, modified the code from a template. Links to some other projects HTML pages.
- Google Translation API – Used this API to translate the content in the HTML page.
- Google Maps API – Used this API to display the map with its latitude and longitude.
- ArcGIS API for JS – This is the API from the ArcGIS software product. Used this to display a basemap and 3D Map using HTML. The Javascript and CSS is provided in the ArcGIS developer site.
- Scrawl-Canvas – Using this javascript library, to create a drawing pad kind of effect. The user gets to draw on the pad in the webpage. HTML, CSS and JS was used.
- Typing Effect – Using HTML and Typeit JS utility, created text that comes in a typing effect. This utility was installed using NPM – NodeJS.
- Resume Page – Using a responsive template as theme, modified the code to depict my resume.
- Tribute Page – Created a brief tribute page on Sheema Kermani, dancer. This was done using HTML and CSS.
- Web App builder – Using the web application builder in ArcGIS Developer site, created this project.
