**Mobile No:** +919946744432
**SkypeId: Nisha Unnikrishnan** (nishaunny5)
**LinkedIn:** https://www.linkedin.com/in/nisha-unnikrishnanunny-48418018/
**Blog:** https://unnisnishawrites.blogspot.com/

Optimistic, enthusiastic and a very powerful warm-hearted woman, like the colourful shades of a rainbow.

I have gathered experience in diverse areas like teaching, research ideas, motivational spirit to find light, writing for technical purpose, team building, project oriented data analysis, software testing, programming during college internship and IT product documentation to summarize.

## Objective

**To make use of traits like communication skill, training ability, self-learning, content writing, problem solving, research and computer skills in an exciting opportunity.**

## Highlights

- TESOL certified with a heart to impart ideas, find joy in learning English language.
- Eager to gather knowledge in subjects like **Website design/development, HTML,CSS,JS and NodeJS** , using online resources like Udemy website.
- In many instances so far, the divine has given opportunities to help others improve confidence, English communication skills, writing skills, test preparation. Also, help others recognize their good talents.
- Had been a good resource in improving English for some of my friends. Helped a friend to attend IELTS exam with confidence.

- Positive minded individual, to help people with disabilities. I have helped gather information to help an autistic child during teaching preschool period. Also helped the teachers and myself involve in a special training program for the special needs children.
- Interested to work in an IT environment. I have had experience in leading, coordinating and helping others a team environment.
- Took part in collecting data, preparing technical documents, using software to prepare documents and been part of data collection, analysis process.
- In my Teaching experience, have lead and organized teachers to think in a more positive way and solve their class issues in a fun way. Designed and implemented curriculum, to suit the needs of the class.
- Preschool experience has led to coordinating and manage their lesson plan at the best. Familiar with arranging lesson plans according to the student's learning style and age group.
- Skilled to understand the abilities of the student and help in an effective manner. Used storytelling and visual learning style to improve the child's love for learning.

        CBSE (10th), 76%

## Languages

Native Malayalam, Fluent English, Fluent Hindi and Moderate Tamil.

## Interests

Loves to travel, eager to update my knowledge, love to perform Bharatnatyam, write short articles, artistic activities, read inspirational and self-help books.

## Work History

**October 2018 -Present**        Interested to learn and gain more knowledge on Website development, design and technologies like **HTML,CSS, JS and NodeJS**. Using online resources and attending courses on Udemy, have completed some projects in the respective areas.

**August 2018**                **Kerala Flood Relief Operations**

**Volunteer**                Assisted to gather, arrange, sort and deliver materials to relief camps and affected houses in Cochin.

**September 2016 to**        **KidZee Infopark**
**January 2017**        Cochin, Kerala
                **Part Time Volunteer**
- Assisting teacher in curriculum activities and arranging the class.

- Invent resourceful ideas for the school programs.
- Motivating the students and teachers to implement the art craft techniques.

| **October 2013 to October 2014** | **NeST Information Technologies Pvt. Ltd.** |

**NeST Information Technologies Pvt. Ltd.**
Cochin, Kerala
**Technical Writer**
- Involved in the documentation aspect of this project (Flight Quality Studio, FliQS). It is the sophisticated next generation software used for flight data analysis and aircraft performance monitoring.
- Documenting and validating the data processed in FliQS.
- Creating documents to explain features, and concepts.
- Created the user manual and help documents.
- Support in testing the product and validating data processed as per the customer queries.
- Used documentation software tools for this project purpose.

**August 2011 to February 2013**

**KidZee Kakkanad**
Cochin, Kerala
**Teacher**

- Worked as a teacher for the 1.5 to 2.5 and 4.5 to 5.5 age category.
- Preparing the yearly and monthly plans, planning for the class and making the class arrangements as per the KidZee curriculum.
- Gathered some experience understanding and *helping children with special needs*. I used to work with a 5 year old child with Mild Autistic behavior that gave a different perspective. During this period, had completed training program related to learning disabilities and gained exposure to Autism with the help of a learning center, Vigyan Valley.
- Assisting the Center Head in various areas like planning for special days or celebrations, organizing meetings and inculcating new

ideas; to improve the day to day functioning of the school.

- Support the administration activities and creating the curriculum plan for the teaching staff to utilize.

**March 2011 to
June 2011**

**Chayowo Games**
Cochin, Kerala
**Content Developer**

- Involved as researcher and a game concept writer for an upcoming PC game project. The link below has the details of this game: http://www.bigfishgames.com/download-games/20104/zodiac-prophecies-the-serpent-bearer/index.html
- Taking part in the game review meetings and discussed ideas.
- Creating various game design documents required for Flash and PC games.
- Also had created content for in-house publications for the company newsletter, on their website and for some presentations.
- Also, assisted the HR department during campus recruitment process.

**August 2010 to
May 2011**

**Spot Writers**
Trivandrum, Kerala
**Freelance Ghost Writer**

- I had gained experience writing some keyword articles.

**May 2007 to
April 2009**

**Emirates Airlines**
Dubai, UAE
**Senior Technical Assistant**

- There was a transition in the legacy system used in the Engineering Area, from EMPACS to ULTRAMAIN, where I was part of this project along with other day to day work involved in the Technical Records Department. Ultramain, was a new system that was being introduced in Emirates Engineering Center for all sorts of flight data management.

- Since there are millions of transactions conducted day to day on this system and viewed by various users, data on the system was of outmost criticality.
- Involved in analysing and gathering the data that needed to be incorporated into the new system.
- Documenting, cross checking and validating the data incorporated into the new system. Took part in the workaround meetings.
- Testing and validating the new system with the data incorporated leading to successful implementation of the ULTRAMAIN.
- Helping other users and creating training documents for the users to do a transaction or view any data on the system.
- Added to all of this, performed the various duties related to Technical Records Management that comes under this role.

**July 2005 to January 2006**

**MAPS Geosystems**
Sharjah, UAE
**College Intern (Practice School)**

- Internship provided this opportunity to understand the various aspects of Software Development in the ESRI Image Server Project. This project provides fast access to large quantities of file-based imagery. It is processed on-the-fly and on-demand.
- Designed, developed and tested web-based Geographic Information System (GIS) software according to OGC (Open Geospatial Consortium, Inc.) certifications called WMS Host, a web map service that would enable the users to access the imagery available from the ESRI Image Server, the product via the web.
- This WMS Host mainly worked on VB.Net environment and ran on the top of IIS.
- Created the required documents & UML Design Model to manage the project.

**June 2004 to
August 2004**

**ETA-ASCON**
Dubai, UAE
**College Intern (Practice School)**

- Created a database for Steel Management for the Central Stores and Purchase department. This was done using VB as the front end and MS ACCESS as the back end.
- Created the required documents for this project.
- Got exposure into all the different work areas this company caters to.
